

Our Vision

To advance musculoskeletal care into the 21st century by combining technology with human potential.

Outcomes Research

Outcomes research seeks to understand the end results of particular health care practices and interventions. By linking the care people get to the outcomes they experience, outcomes research has become the key to developing better ways to improve the quality of care.

Value to You

Our goal is to seek and find answers to a variety of questions that bring new knowledge and improved care to you, our patient. Research improves patient outcomes by answering questions as to how we can provide better orthopaedic care.

**Grateful Patient
Donor Program**

The Power to Improve Lives

- Fix a broken bone
- Replace a worn out joint
- Repair torn tendons and ligaments
- Fix a crooked spine

These are the everyday missions of orthopaedic surgeons, to get people back on their feet, stepping forward, living without pain and without limitations.

The Blueprint of Success

The ORF has supported the research needs of orthopaedic physicians since 1986. Studies in joint replacement, spine surgery, cartilage restoration and advancements in trauma care have all been coordinated through the ORF.

The Potential

Your donation will help support the technology needed to examine the impact of orthopaedic care on patients and their families.

- Web based patient education and communication
- Electronic registries for evaluation of new devices
- Evaluate impact of new devices and procedures
- Examine current methods of treatment

“My life has been wonderful as I can now walk miles at a time and play with my grandchildren without the agonizing pain.”

“This is a true blessing for being able to continue my work and live without continuous pain.”

“As a patient, I very much felt like a part of the team whenever I talked with my doctor or his staff.”
