

Pricing for Platelet-Rich Plasma Injections and Orthobiologic Therapies

Orthobiologics are natural tissue-derived products that orthopedic surgeons use on orthopedic injuries and conditions. Orthobiologic therapies may help decrease pain, restore function and may help avoid or delay major surgery, like joint replacement surgery.

When non-surgical treatment options like physical therapy, medication, bracing or cortisone injections have failed, OrthoIndy may prescribe platelet-rich plasma (PRP) injections or tissue and cell therapies.

Unfortunately, these orthobiologic treatments are not currently covered by insurance. Most insurance programs, Medicare and Medicaid label PRP injections and orthobiologic therapies as “experimental or investigational” and do not pay for these treatments.

You will be required to pay for your injection at the time of your treatment.

Consult with your Health Savings Account (HSA) adviser prior to your appointment, as prescribed medical treatments may be allowed for payments from your HSA account.

OrthoIndy uses the following types of PRP and tissue and cell injections. Depending on which one is used in your treatment, the pricing is indicated below.

Pricing for PRP Therapy Options		
OrthoIndy Fees	Unilateral	Bilateral
Arthrex ACP	\$700	\$1,400
Arthrex Angel	\$700	\$1,400
Aurix	\$450	\$900
Zimmer Biomet	\$650	\$1,300

Pricing for Tissue and Cell Therapies		
OrthoIndy Fees	Unilateral	Bilateral
LipoGems	\$2,600	\$3,600
